LinkedIn | Portfolio

Professional Summary

Data Science postgraduate with a unique interdisciplinary background in Biotechnology and Data Science. Strong foundation in SQL, Python, Power BI and Tableau with hands-on experience in building end-to-end analytics solutions. Passionate about transforming complex data into actionable insights to support data-driven decision-making

Skills

Languages: Python, R, SQL
Data Visualization: Power BI, Tableau, Looker Studio
Tools & Platforms: Streamlit, Google Cloud Platform (GCP), SAS, WEKA

Project Undertaken

Fraud Analytics & Machine Learning Detection | Python, SQL, Tableau, ML

- Processed and analysed **300,000+ transaction records** using SQL and Python
- Developed and deployed an interactive fraud prediction app using Streamlit.

ASEAN Food Insecurity Monitoring: Machine Learning Forecast & Prediction |Python, Tableau, ML

- Extended academic project with forecasting and interactive dashboards with geographic visualization
- Implemented forecasting model for food insecurity trends with low forecast error (**MAE: 0.55, RMSE: 0.75)**

Malaysia Crop Production Analytics: Machine Learning Forecast & Prediction |Python, Power BI, ML

- Analysed national crop production data (OpenDOSM) to identify regional trends and crop specialization.
- Developed machine learning models to predict crop production with high accuracy (R^2: 0.90)

Cardiac Rehabilitation Prediction |Python, ML

- Analysed real medical data and applied feature selection techniques to improve model performance
- Achieving 95.1% accuracy in predicting rehabilitation recommendations exceeded previous similar studies

Global Economic Impact Analysis |Google Cloud Platform, Looker Studio

- Processed World Bank datasets using Google Cloud Platform
- Developed an interactive dashboard using Looker Studio to visualize economic trends

Work Experience

Research Assistant Intern
Agriculture Research Centre Semongok, Kuching, Sarawak June 2018 – October 2018

- Assisted project '**Genetic Variation of Durian (Durio zibethinus) Clones in Sarawak Assessed by Simple Sequence Repeat (SSR) Markers)'.**
- **Conducted DNA extraction** from nine distinct durian samples, ensuring high-quality genomic material for analysis
- Successfully differentiated eight out of nine durian types, providing valuable insights into the genetic diversity of durian clones

Education

Master of Data Science Graduated: 2024
University of Malaya, Malaysia
Bachelor of Science (Biotechnology) Graduated: 2018
Swinburne University of Technology Sarawak, Malaysia
